National Public Seating

ASSEMBLY INSTRUCTIONS
8100 SERIES | STACK CHAIR

8100 STACK CHAIR COMPONENTS

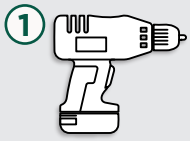

INCLUDED HARDWARE

#8 Screw x4

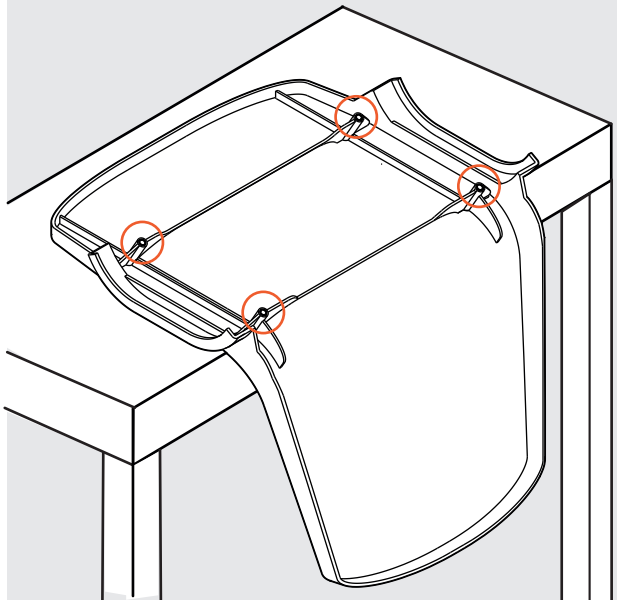

RECOMMENDED TOOLS

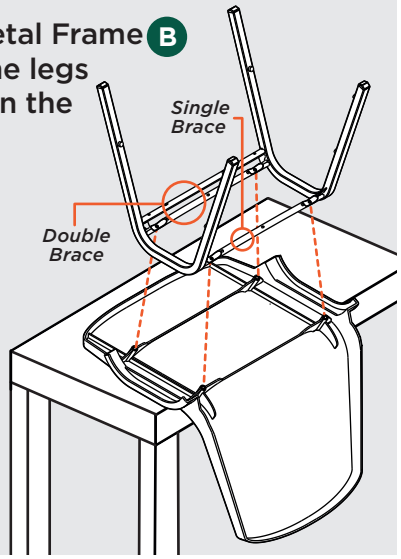

Drill

Screwdriver

1 Begin by placing the Seat Shell (A) over the edge of a work bench or a table with the Backrest facing downward and the underneath of the seat facing upwards. Identify the four holes located on the underside of the seat, as shown.

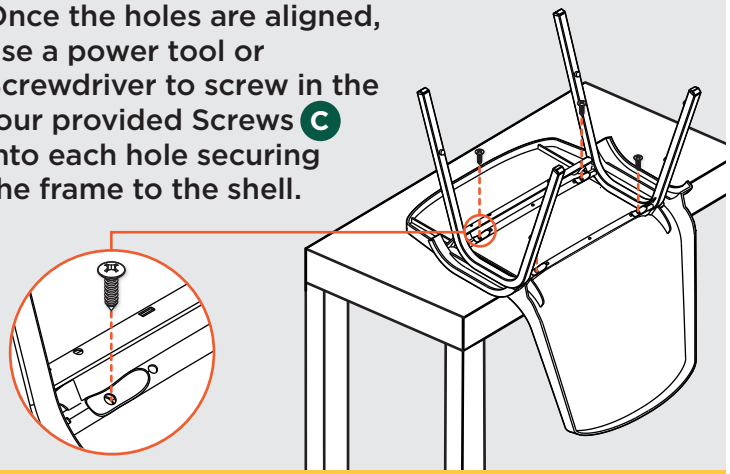

2 Proceed to place the Metal Frame (B) over the Shell (A) with the legs facing upwards and align the four outer holes on the brace rods with four holes on the underside of the seat.

IMPORTANT: Be sure to place the side of the frame with the double brace towards the front of the Seat and the side of the frame with the single brace on the side of the Backrest.

3 Once the holes are aligned, use a power tool or Screwdriver to screw in the four provided Screws (C) into each hole securing the frame to the shell.

CAUTION: Do not over tighten the screws or you risk the plastic from stripping.

Double check all Screws to be tightened securely before use. Check all Screws periodically. Failure to completely tighten the Screws may result in tipping and possible injury!

Congratulations, your STACK CHAIR is now assembled and ready to be used!
