

Contour and Eco Contour Collections

be **green**
be **innovative**

Replace in your standard plastic room amenities in favor of our new Contour and Eco Contour Collections. Contour pieces are made from high density polyethylene in our popular natural Essential Line colors. Hapco has partnered with a major international supplier of biopolymers to offer our Eco Contour Collection manufactured using a certified Green Biopolymer in accordance with standard ASTM D 6866. This has the same durability and end of lifespan recyclability as regular polyethylene but made eco-friendly and sustainable.

Eco Contour Collection

- EC108- "Green" 8 Qt. Eco Contour Wastebasket
